Superior technology for floor cleaning

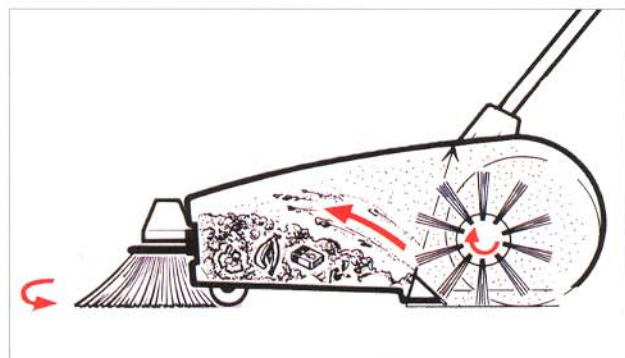

Simple Sweeping!

Walk-behind sweeping machine
"Flipper" with un-equalled
sweeping performance:
Sweeps an area of
up to 1500 m²/ hour.
Robust construction
with rust-free
powder coated
steel frame
and hopper.

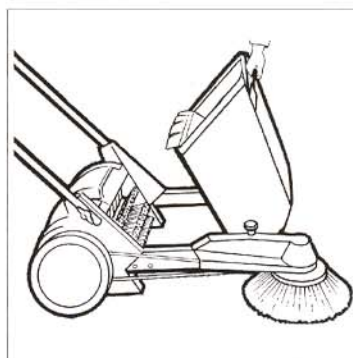

Working mechanism

Clean working method

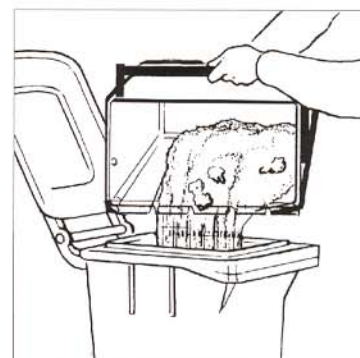

The side broom sweeps dust and debris from corners, directly into the path of the wide main broom, which in turn flips the same into the large self collecting hopper.

Emptying of dust hopper made easy

The dust hopper can be easily emptied.

The built-in handle enables easy emptying of dust and debris into the trash bin.

The walk-behind sweeping machine, Flipper 10 times quicker than a traditional broom!

Does anyone like using a broom to sweep? Manual sweeping is simply not in keeping with the times. It is, above all, time consuming and back breaking. Besides, a person using a traditional broom is not productive enough.

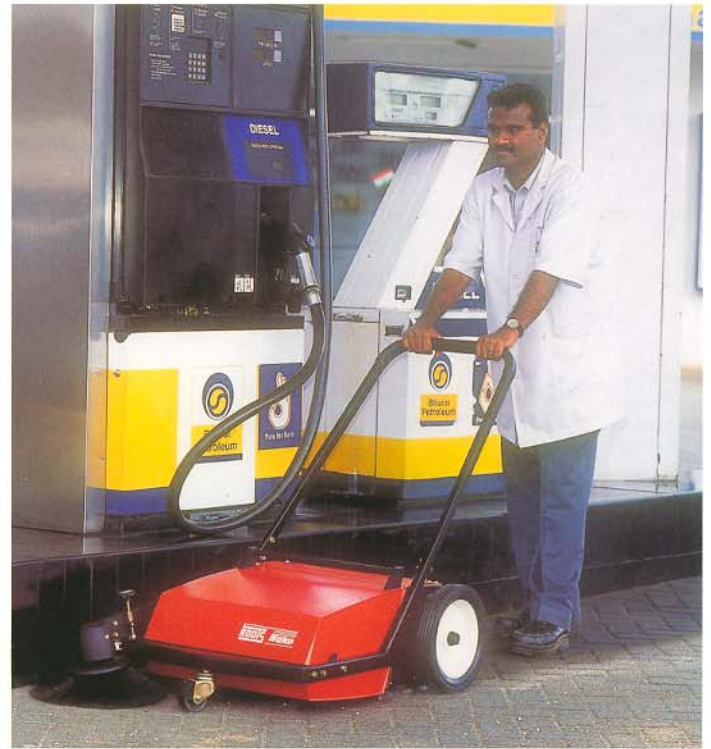

The Flipper is an intelligent solution for quick and easy cleaning. The dust is swept and collected into a self collecting hopper with the aid of the main broom and the side brush. The broom chamber is completely sealed with rubber strips, which ensures absolutely pollution-free sweeping.

Application Areas:

- ❖ Pavements and parking lots
- ❖ Fuel stations
- ❖ Gangways and Aisles in industries
- ❖ Cement mills
- ❖ Plants and township Roads
- ❖ Warehouses

Clean working method and large area performance, time and again. Machine suitable for daily, industrial use-for both indoor and outdoor cleaning. Clean working method for both fine dust and larger dirt particles.

This sweeping machine picks up dust automatically and leaves even corners spotlessly clean. Particularly handy, manoeuvrable and extremely easy to operate. An ideal solution for trade, industry, property owners and many other similar applications.
