Riverina Lift Trucks
The easy way to move a load

What you *want* matters
What you *think* matters
What you *need* is vital
We deliver.

GRIFFITH | WAGGA WAGGA | BATHURST | SHEPPARTON

Welcome

Welcome to the Autumn edition of the Riverina Lift Trucks quarterly newsletter for 2015.

It's been a terrific start to the year with the introduction of new models to our range and the launching of our updated website.

With the recruitment of some key technicians to our business, joining our existing experienced team, we feel confident of continued growth and prosperity throughout NSW and Victoria, and our ability to support our customers.

We hope you enjoy this edition.
Any feedback is always welcome.

On behalf of the staff,
we'd like to thank you for your continued support.

Robert Cappello

MANITOU MLT 960 NEW HEAVY DUTY FARM TELESCOPIC HANDLER

The MLT-X 960 telescopic loader is the ideal choice when you need a combination of loading power and high lift height. Specializing in material handling tasks, this unit excels in heavy duty farm work. The MLT-X 960 is equipped

with a powerful 141 hp (104 kW) Interim Tier IV John Deere diesel engine and a Continuously Variable Transmission (CVT) gearbox which provides smooth drive operation while maintaining maximum tractive effort at any speed. The transmission control reacts to the demand on the machine to provide the correct torque and speed automatically without interruption. By enabling the engine to run at its most efficient speed, the CVT system provides better fuel economy than other transmission systems.

The MLT 960 easily handles the demands of high capacity material transport for agricultural use.

Never Run out of LPG Again!

With an easy to install Low LPG Fuel Indicator, low levels of gas are detected and you are alerted by the dash indicator.

Suits most makes and models!

CALL Robert or Matt - 02 6962 6255 - for details

The Low LPG Fuel Indicator is a new technology that senses when the cylinder has approximately 25% of LPG left in the cylinder. This gives the forklift operator 20-30 minutes advanced notice to complete the job and exchange cylinders in a safe area.

The indicator does not use pressure to detect fuel levels! Instead, it accurately detects change from a liquid to gas state.

In today's fast moving world, there is a constant drive to have goods transported from one location to another efficiently, at low cost and on time, to satisfy the needs of both industry and consumers.

Front End

8,000 - 10,000kg

The 2-stage LFL mast features heavy sections and large diameter rollers. Thanks to the wide opening between the mast channels, the operator has an excellent view of both the load and the operating environment. The mast design also helps to reduce load damage, as the excellent visibility helps to ensure precise handling.

The masts are compatible with a standard carriage or integral side shifter with both individual or simultaneous fork positioning.

Masts are mounted on the drive axle for maximum stability and are supported by large tilt cylinders with fine rod threads and spherical bearings. A number of mast lift heights, ranging from 3000 through 6000 mm, are available to suit various customer applications.

Hydraulics

Operated through cowl-mounted levers, with 4 function hydraulic controls and 2 auxiliary functions. The hydraulic tank features a combined dipstick and oil breather.

Wheels and Tyres

Conventional rim assembly with pneumatic bias ply tires. Pneumatic shaped solid (standard compound) tires are available as an option.

Frame

The steel fabricated frame is extremely durable for a long life and features integrated hydraulic and fuel tanks.

Integrated counterweights are designed to enable optimal stability under all load conditions.

Brakes

Conventional drum brakes all-round, with automatic adjustment.

Engines

UTILEV® UT80-100P trucks are equipped with a Cummins 4 cylinder 4.5L QSB Tier 3 Diesel engine rated at 82 kW (110 HP).

**From HUMBLE BEGINNINGS and into the future
with RLT**

**'Semper ad
maiora'**

De Bortoli Wines is a third generation family wine company established by Vittorio and Giuseppina De Bortoli in 1928. The couple emigrated to Australia from Northern Italy, from mountain villages at the foothills of the Italian Alps, near the historic town of Asolo.

Their son, the energetic and dynamic Deen De Bortoli, (b 1936 – d 2003) expanded and consolidated the business created by his parents. Deen's children established De Bortoli's reputation for premium wine including icon dessert wine Noble One and the Yarra Valley wines.

Italian family values passed down from Vittorio remain core. There is a culture of hard work, generosity of spirit and of sharing good food, good wine and good times with family and friends.

One of the first Forklifts supplied to De Bortoli Wines, serviced by Robert

The De Bortoli family motto Semper ad maiora - (Always striving for better), underpins everything the company does. Deen De Bortoli was one of the very first customers of RLT. He enjoyed a great relationship with the Cappello family which has added to today's alliance with the De Bortoli Wine family company.

RLT NEWS

LONG SERVICE Mitchell Rossetto - 10 years with RLT

Riverina Lift Trucks would like to thank Mitchell Rossetto for his commitment and excellent services to our company.

Additions to our Technical Staff.

RLT has now added three more experienced mechanics to our team bringing a wealth of experience to our business, having worked in the materials handling industry on leading brands of forklifts adding additional support to our customers.

DE BORTOLI WINES

Forklifts supplied to De Bortoli Wines today.

Riverina Lift Trucks today employs over 30 staff members over 4 branches, while De Bortoli Wines is now home to some of Australia's most prestigious and sought after wines, and relies on RLT's consistent and efficient service and wealth of experience.

Testament to RLT

"De Bortoli Wines has been working with Robert Cappello and Riverina Lift Trucks since the beginning of RLT in 1983. Due to the integrity, flexibility and efficiency of RLT's service, we will be sure to continue relying on their commitment to our business. I would have no hesitation in recommending their products and their services."
